Summer Program in Clinical and Translational Research Methods: Enhancing a Practitioner’s Toolkit

Join Us!
Clinicians, medical students, research coordinators, and others who wish to incorporate clinical and translational research into their careers are encouraged to join us for this three day introduction to clinical and translational research methods.

Purpose:
We will introduce participants to the methodologies and techniques required to conduct clinical and translational research. At the conclusion of the course participants should be able to:
- Convert research questions into specific aims
- Discuss a range of research methods and study designs
- Explore online bibliographic citation management software and navigate numerous proprietary databases available through the UIC Health Sciences Library
- Explain the ethical considerations of research, including requisite Institutional Review Board (IRB) approval

Questions:
Contact Susan Lynch at slynch2@uic.edu or 312/413-5429 for more information.
